PROFESSIONAL SUMMARY

Computer Science graduate (4.0 GPA, summa cum laude) with hands-on experience developing full-stack applications using Java, Spring Boot, React, Next.js, and MySQL. Experienced in software development, IT security/compliance, accessibility testing, and collaborative project environments.

EDUCATION

California State Polytechnic University, Pomona **Pomona, CA**

Bachelor of Science, Computer Science, summa cum laude **May 2026**

- *GPA:* 4.0
- *Relevant Coursework:* Computer Organization & Assembly Programming, Data Structures, Object-Oriented Design, Operating Systems, Software Development, Systems Programming, User Interface Design
- *Awards:* President's List (2022-2025)

TECHNICAL SKILLS

- *Languages:* Java, Python, JavaScript, TypeScript, SQL, HTML/CSS
- *Frameworks/Libraries:* React, Next.js, Spring Boot, Tailwind CSS, Bulma CSS, Bootstrap, Java Swing
- *Tools:* Git, GitHub, GitHub Copilot, Figma, Unity, Adobe Acrobat, Equidox
- *Environments:* Windows, Unix

WORK EXPERIENCE

IT Security & Compliance Assistant, Cal Poly Pomona **Pomona, CA, Mar 2025 - May 2026**

- Tested and documented compliance with accessibility standards on over 50 university and commercial websites
- Remediated over 50 PDFs of university reports and technical documentation using Equidox and Adobe Acrobat Pro
- Evaluated and summarized security documents from over 20 vendors to ensure compliance with university protocols

STEM Instructor Intern, Lavner Education **Pomona, CA, Jun 2024 - Aug 2024**

- Instructed students ages 5-12 on STEM topics, such as programming, robotics, graphic design, and computer skills
- Fostered a supportive and inclusive learning environment, serving as a mentor and role model for campers
- Organized and prepared educational materials, ensuring smooth daily operations and efficient class transitions

PROJECTS

Pyro | Next.js | GitHub **Jan 2025 - May 2025**

- Developed reusable React components and responsive forum interfaces using Next.js, Tailwind CSS, and HeroUI, integrating frontend components with a SQL-backed system design
- Designed and implemented the 10-component system architecture using SQL and diagramming tools
- Documented the system requirements, architecture, and design while following a strict 15-week timeline and delivered a 141-page final product report

PokéPath | Java Swing | GitHub **Oct 2024 - Dec 2024**

- Developed an interactive elemental-battling desktop game, featuring a dynamic user interface built with Java Swing
- Implemented a turn-based combat system, leveraging object-oriented design and MVC architecture for scalability and maintainability

PayMe | Spring Boot | GitHub **October 2023 - December 2023**

- Collaborated with a team to develop PayMe, a secure intermediary platform for peer-to-peer payments, built with React, HTML, CSS, JavaScript, and Bootstrap for the front-end design and MySQL for the back-end database
- Implemented core features such as payment request handling, fund transfers, and transaction history, with the front-end connecting to the back-end via the Spring Framework and Spring Boot
- Ensured system security by integrating encryption protocols and validating user credentials to protect sensitive financial data

VOLUNTEER EXPERIENCE

Webmaster, CPP Management Information Systems Student Association **Mar 2025 - May 2026**

- Rebuilt club website using Bulma (CSS framework) and GitHub Pages by Fall 2025 deadline to welcome incoming students
- Reviewed and documented the code base to ensure maintainability and extensibility for future club webmasters

Representative, CPP Management Information Systems Student Association **Aug 2024 - Oct 2024**

- Collaborated in a team of six in four demonstrations and two promotional videos used in all event advertising for the CPP Cybersecurity and Awareness Fair
- Explained the process of social engineering, psychology behind its successes and open-source intelligence tools used for pretexting through hands-on activities to over 400 high school and college students
